### UNIT 1 – PUBLIC SERVICE ANNOUNCEMENT

#### Label the pictures

Distracted driving - Obesity – Littering - Depression – Bullying – Domestic violence

#### Complete the text

obesity - hormonal - causes - activity

Children become overweight and obese for a variety of reasons. The most common \_\_\_\_\_ are genetic factors, lack of physical activity, unhealthy eating patterns, or a combination of these factors.

Only in rare cases is being overweight caused by a medical condition such as a \_\_\_\_\_ problem. A physical exam and some blood tests can rule out the possibility of a medical condition as the cause for obesity.

Although weight problems run in families, not all children with a family history of \_\_\_\_\_ will be overweight. Children whose parents or brothers or sisters are overweight may be at an increased risk of becoming overweight themselves, but this can be linked to shared family behaviors such as eating and \_\_\_\_\_ habits.
